**Thanks for purchasing "20 Animated titles / MOGRT" project!**
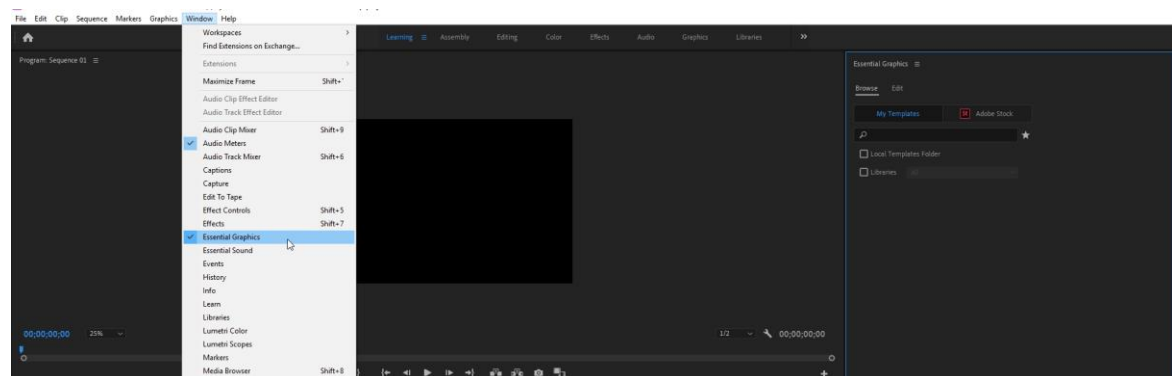

It's really easy to customize.

First you need **to buy and install** the **font "Geomanist"** by this link:
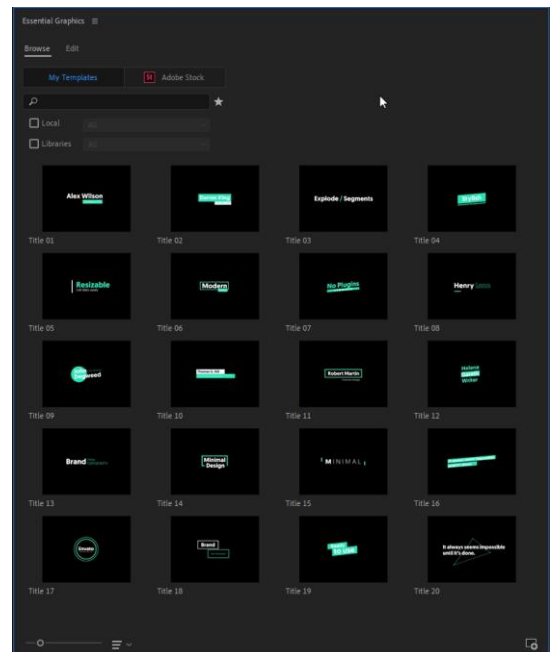

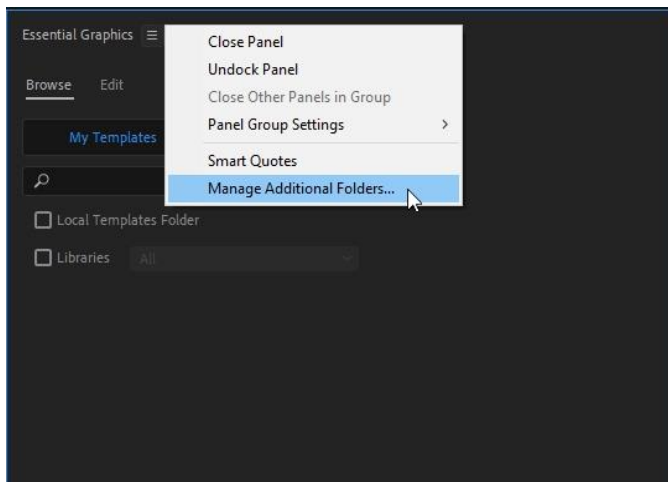

http://atipofoundry.com/fonts/geomanist/pay-what-you-want

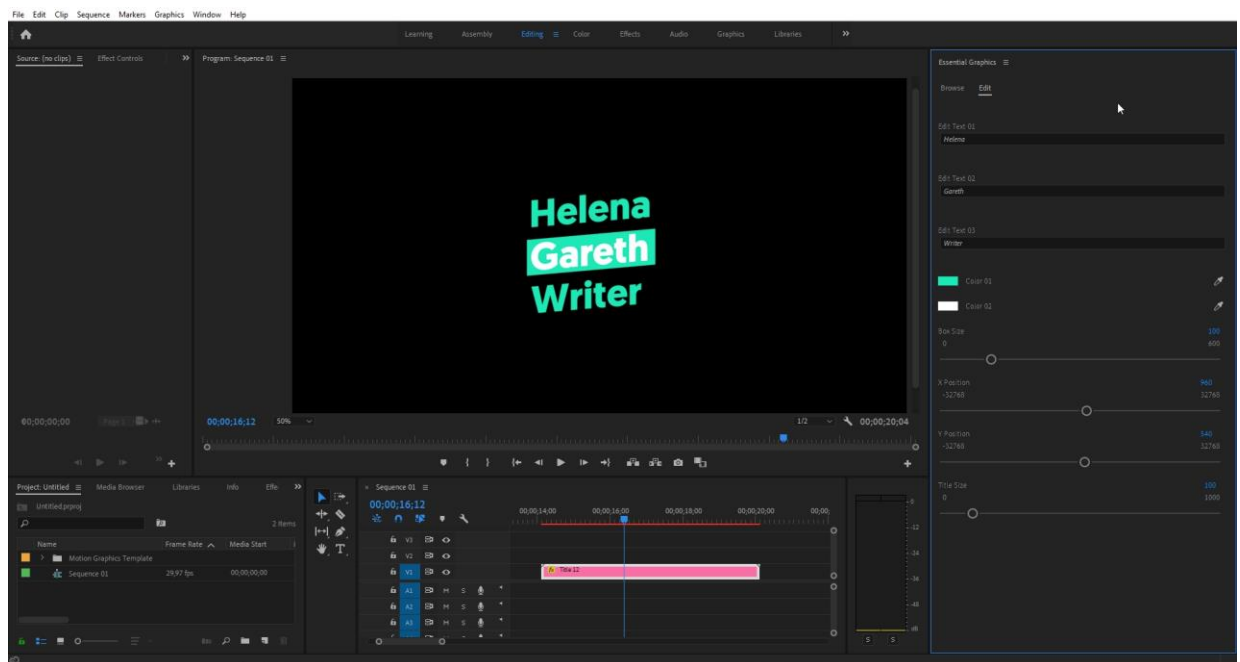

1 step. Open Premier Pro CC 2019 or above and then turn on the **"Essential Graphics"** panel (*Window > Essential Graphics):*

2 step. Use a special **option to add** a folder ("20 Animated Titles For Premiere Pro") with files **.mogrt**:

3 step. Drag and drop the required title to the sequence and **customize** some setting (text, colors, position, scale and etc.):

Also, you can use one scene many times with other settings - drag and drop again on timeline.

If you have any problems or questions you can send me on email: **d.o.coy2@gmail.com**

Best Regards
